

QUOTATION & REQUIREMENT DOCUMENT

For Android Application Development

Date: 28/01/2026

Quotation No: APP0152158-R1

Prepared By: Akshat Vora

Client Name: Savan Bhai Kondhia (Saar Data Services Pvt. Ltd.)

Project Title: Gold Jewellery Application (Android)

1. Project Overview

This document represents a **premium, end-to-end development proposal** for a custom-built **Gold Jewellery Android Application**, developed as a **one-to-one functional and visual clone** of an existing reference application, namely **“[Rajendra Gold](#)”**.

The objective of this project is to **replicate the core structure, user flow, and business logic** of the reference application while implementing the client-specific requirements outlined in this document. The development will focus on accuracy, stability, and controlled enhancements, rather than experimental or unproven features.

The application is engineered with a **secure, scalable, and role-driven architecture**, ensuring performance, reliability, and long-term maintainability. While the reference app is used for functional alignment, the codebase, authentication logic, and backend handling will be **entirely rebuilt from scratch**.

The scope includes **requirement engineering, UI/UX replication and refinement, backend logic implementation, security controls, testing, and final production-ready delivery**.

2. Reference Application Alignment

- Reference Application Name: **Rajendra Gold**
- Platform: Android (Google Play Store)
- Development Approach: **One-to-one functional and UI clone**

The following aspects will be aligned closely with the reference application:

- Screen flow and navigation structure
- Product listing layout and category hierarchy
- Pricing display logic
- User interaction patterns

Any **additional features, deviations, or enhancements** beyond the reference application will be treated as **scope additions** and may require timeline or cost adjustment.

3. Functional Requirements

2.1 Super Admin Features

The Super Admin will have full control over the application, including:

- Create and manage users (Wholesalers / Retailers)
- Add, update, and delete products

- Add and manage **Main Categories**
 - Add and manage **Sub Categories**
 - Upload and manage product photos
 - Add and update product rates
 - New stock availability notifications
 - Receive notification/message when users add products to cart
 - Centralized dashboard for management and monitoring
-

2.2 User Roles & Access

- **Super Admin Login**
 - Login using **Mobile Number + OTP**
 - **Wholesaler Login**
 - Login using **Mobile Number + OTP**
 - **Retailer Login**
 - Login using **Mobile Number + OTP**
 - **RBAC (Role-Based Access Control)**
 - Feature access strictly controlled based on assigned role
 - Super Admin has full access
 - Wholesalers and Retailers have restricted access as per role permissions
-

2.3 Application Features

- Product listing with category and sub-category structure
 - Product image gallery
 - Add-to-cart functionality
 - Cart action triggers notification/message to Super Admin
 - Real-time product rate visibility
 - New stock update notifications
-

2.4 UI / UX Requirements

- Fully **polished and professional UI design**
- **Responsive layout** compatible with all Android screen sizes and resolutions
- Clean navigation and optimized user experience

Removed Sections (As Requested):

- FAQ Section – **Removed**

- Live Chat Section – **Removed**
-

3. Scope of Work

- Detailed requirement engineering and validation
 - Premium UI/UX design aligned with jewellery business aesthetics
 - Native Android application development
 - Secure backend logic and API integration (if required)
 - OTP-based authentication system
 - Role-Based Access Control (RBAC) implementation
 - Notification and messaging logic
 - Comprehensive QA and dynamic testing
 - Production-ready APK / AAB build delivery
-

4. Project Cost

Total Development Investment:

Rs. 26,000/- (Rupees Twenty-Six Thousand Only)

This cost reflects:

- Custom-built architecture (not a generic app)
 - Secure authentication and role management
 - Scalable backend-ready design
 - Business-grade UI and performance optimization
-

5. Payment Terms

- 50% advance payment at project initiation
- 50% remaining payment after project completion

(Payment terms can be mutually decided if required)

6. Delivery Timeline

- **Estimated completion:** 30 working days
- Timeline starts after final requirement confirmation and advance payment

Project Timeline Breakdown

- **5 Days** – Requirement Gathering and Understanding
- **20 Days** – UI and Back-end Development
- **5 Days** – QA, Application Dynamic Testing, and Applying Fixes

7. Change / Revision Policy

- **1st Draft Hand-over** will be provided after initial development completion
- Changes / alterations will be gathered after the 1st draft review
- Changes and alterations will take time depending on their **complexity and impact**
- First **5 changes after final delivery** will be **FREE**
- From the **6th change onward**, each change will be charged **Rs. 300 per change**
- A “change” refers to any modification beyond the approved scope

8. Technical Architecture Summary

To ensure scalability, security, and maintainability, the application will follow a **layered technical architecture** as outlined below:

Application Layer (Android Frontend)

- Native Android UI with responsive layouts for all screen sizes
- Modular UI components for easy future enhancements
- Secure session handling and OTP-based authentication flows

Business Logic Layer

- Centralized role-based access control (RBAC)
- Separation of admin, wholesaler, and retailer permissions
- Validation logic for product management, pricing, and stock updates

Data & Backend Layer

- Structured data models for users, roles, products, categories, pricing, and stock
- Secure API communication (if backend APIs are used)
- Designed to support future expansion (web admin, iOS app, analytics)

Security & Reliability

- OTP-based login reduces password-related attack surface
- Role isolation prevents unauthorized feature access
- Input validation and controlled data flow

This architecture ensures the application is **future-ready**, minimizes rework costs, and supports business growth without requiring a rebuild.

9. Legal & IP Disclaimer

- The reference application “**Rajendra Gold**” is used strictly for **functional and UI alignment purposes only**.
- This project does **not** include transfer of ownership, licensing, or intellectual property rights of the reference application.

- All code, architecture, logic, and implementations developed under this project will be **original and independently written**, without reuse of proprietary source code from the reference application.
- The client will receive ownership of the **custom-developed application code** created under this agreement, subject to full payment clearance.
- Any legal responsibility arising from brand similarity, trademark usage, or store listing compliance lies solely with the client.

10. What Is NOT Included (Out of Scope)

The following items are **explicitly excluded** from this quotation unless agreed separately:

- Ownership, resale, or licensing rights of the original Rajendra Gold application
- iOS (Apple) application development
- Web admin panel or website development
- Hosting, server setup, or cloud infrastructure costs
- SMS gateway, OTP charges, or third-party API subscription fees
- Google Play Store account creation or listing fees
- Post-launch maintenance, monitoring, or feature upgrades
- Marketing, ASO, or user acquisition activities
- Future feature additions not present in the reference app or defined requirements

11. Future White-Label Customization Clause

If, in the future, the client requires this application to be customized for **their own customers or downstream clients**, the following terms will apply:

- Minor customization limited strictly to:
 - Application name change
 - App icon / branding name update
 - Colour code or theme colour adjustment (if required)
- Such customization will be charged at a **flat fee of Rs. 1,500/- per customization**.
- No functional changes, feature additions, workflow modifications, or logic changes are included under this fee.
- Any customization beyond branding and color changes will require a **separate quotation** and timeline assessment.

12. Reference Comparison Table

Aspect	Rajendra Gold (Reference App)	Proposed Application
Platform	Android	Android
UI / UX Flow	Existing production design	1:1 aligned clone

Aspect	Rajendra Gold (Reference App)	Proposed Application
Authentication	Mobile-based login	Mobile Number + OTP
User Roles	Admin / Users	Super Admin / Wholesaler / Retailer
Access Control	App-defined	RBAC (Role-Based Access Control)
Product Management	Available	Included
Category Structure	Main & Sub Categories	Included
Pricing Management	Available	Included
Stock Notifications	Available	Included
Cart to Admin Alerts	Limited / App-specific	Explicitly implemented
Codebase	Proprietary	Fresh, custom-built
Scalability	Unknown	Backend-ready architecture

12. Terms & Conditions

- The quoted amount of Rs. 26,000/- excludes third-party services (SMS gateway, APIs, hosting, Play Store fees, etc.)
- Major feature additions or scope expansion will require a separate quotation
- Delays due to late client feedback, approvals, or content submission may impact delivery timeline
- Final build and complete source code will be delivered only after full payment clearance
- Developer is not responsible for Google Play Store approval or rejection
- Maintenance and future updates are not included unless agreed separately
- This quotation is valid for **5 days** from the issue date

9. Acceptance

I hereby accept the above quotation and agree to the requirements, scope, and terms mentioned in this document.
