# 1. Agreement Overview

This Service Level Agreement (SLA) defines the terms and conditions of post-delivery maintenance and technical support provided by the Engineering Delivery Team (hereinafter referred to as 'the Support Provider') to Vishal Gold (hereinafter referred to as 'the Client') following the formal handover of the Vishal Gold mobile application.

This agreement becomes effective from the date of both parties' signatures on the Project Completion Report and the acceptance of this document. It supersedes any informal support commitments made during the project development phase.

| Attribute            | Value                                                |
|----------------------|------------------------------------------------------|
| Agreement Start Date | [DATE OF SIGNATURE]                                  |
| Initial SLA Term     | 3 months (rolling renewal available)                 |
| Support Coverage     | Android application, Firebase backend, documentation |
| Excluded Platforms   | iOS, Web (not in scope for current project)          |

# 2. Support Scope

The support covered under this SLA includes the identification and remediation of defects discovered in the delivered application, guidance on operating the Admin Dashboard, assistance with Firebase Console operations, and advisory support for security findings escalated from the Security Disclosure Document.

## 2.1 Included in Scope

- Bug fixes for defects reproducible in the delivered codebase.
- Firebase configuration assistance (rules deployment, user management guidance).
- Minor feature adjustments (e.g., changing text, adjusting limits, color changes).
- Deployment assistance for production releases and hotfixes.
- Code review and guidance for any internal technical team working on the project.
- Security advisory for residual VAPT findings (consultation, not full remediation).

## 2.2 Excluded from Scope (Covered Under Separate Engagement)

- New feature development not present in the delivered application.
- iOS or web platform development.
- Integration with third-party ERP, inventory, or payment systems.

- Defects caused by client modifications to the source code after handover.
- Infrastructure outages attributable to Firebase or Google Cloud platform issues.

### 3. Support Tiers & Issue Classification

All issues raised by the client will be classified upon receipt according to the following severity tiers. Classification will be performed by the Support Provider in consultation with the client, taking into account business impact and user exposure.

| Severity      | Definition                                                           | Example                                                                |
|---------------|----------------------------------------------------------------------|------------------------------------------------------------------------|
| P1 — Critical | Application unusable; major data loss or security breach in progress | Authentication completely broken for all users; Firestore data exposed |
| P2 — High     | Major feature non-functional; significant business impact            | Cart fails to save for all Wholesalers; Admin login non-functional     |
| P3 — Medium   | Feature degraded but workaround exists; moderate impact              | Push notifications not delivered; images load slowly                   |
| P4 — Low      | Minor issue; no significant business impact                          | Minor UI misalignment; typo in system text; cosmetic issue             |

### 4. Response & Resolution Commitments

| Severity      | Initial Response | Root Cause Analysis | Resolution / Fix Deployment        |
|---------------|------------------|---------------------|------------------------------------|
| P1 — Critical | 2 business hours | 4 business hours    | 24 hours (hotfix deployment)       |
| P2 — High     | 4 business hours | 1 business day      | 3 business days                    |
| P3 — Medium   | 1 business day   | 2 business days     | 7 business days                    |
| P4 — Low      | 2 business days  | 5 business days     | Next scheduled maintenance release |

Response times are measured from the time the client submits a support ticket during business hours. Tickets raised outside business hours will be treated as received at the start of the next business day (except P1 issues, for which an emergency contact protocol is in effect, as described in Section 7).

### 5. Support Channels & Hours

---

## 5.1 Business Hours

Monday through Saturday, 10:00 AM to 7:00 PM IST (UTC+5:30). Public holidays observed.

## 5.2 Contact Channels

| Channel                               | Use Case                            | Priority       |
|---------------------------------------|-------------------------------------|----------------|
| WhatsApp Business (designated number) | Primary contact for all issues      | All severities |
| Email (designated address)            | Formal bug reports, change requests | P3, P4         |
| Emergency Phone (designated number)   | P1/P2 issues outside business hours | P1, P2 only    |

**Note:** Issue details and reproduction steps **MUST** be provided in writing (WhatsApp or email) even for phone-reported issues. Verbal-only reports cannot be acted upon.

## 6. Out-of-Scope Items

---

The following items are explicitly excluded from this SLA and will be quoted separately as new work engagements if the client wishes to pursue them.

| Item                                    | Reason                                          |
|-----------------------------------------|-------------------------------------------------|
| New feature development                 | Beyond original project scope                   |
| iOS application                         | Not in scope; requires separate Flutter build   |
| Performance optimizations (major)       | Requires architectural changes                  |
| Third-party API integrations            | New scope and billing required                  |
| Client-side code errors (post-handover) | Client assumes responsibility for modifications |

## 7. Escalation Procedure

---

If the client believes that a support issue is not being progressed in accordance with the commitments in this SLA, the following escalation path should be followed.

1. Level 1: Contact the assigned support engineer directly via WhatsApp and reference the open ticket ID.

2. Level 2 (if unresolved after 24 hours): Contact the Engineering Team Project Manager directly.
3. Level 3 (formal escalation): Submit a formal written complaint via email to the managing director of the Support Provider.

## 8. SLA Review

---

This SLA will be reviewed by both parties at the 3-month mark and at each renewal point. Either party may request amendments in writing with 30 days' notice. The SLA remains in force until formally terminated by either party with 30 days' written notice.

### Authorization & Sign-Off

The undersigned parties confirm that they have reviewed the contents of this document and agree to its terms and findings.
