

PLAY STORE SUBMISSION CHECKLIST

Vishal Gold App — Pre-Submission Compliance & Readiness Checklist

Project	Vishal Gold — B2B/B2C Jewelry App
Prepared For	Vishal Gold Marketing & IT Team
Prepared By	Engineering Delivery Team
Version	v1.0
Date	February 25, 2026

Table of Contents

1. Overview
2. Pre-Submission Technical Checks
3. Play Console Account Setup
4. Store Listing Requirements
5. Content Rating & Policy Compliance
6. Privacy Policy Requirements
7. Data Safety Section
8. Final Submission Steps

1. Overview

This checklist is designed to guide the Vishal Gold team through the complete process of preparing and submitting the Vishal Gold Android application to the Google Play Store. Each section must be completed in full before proceeding to the final submission step. Google Play has rigorous review criteria, and an incomplete or non-compliant submission may result in rejection, delaying the application's availability to users.

The checklist is organized in the recommended sequential order of completion. Mark each item as complete before advancing to the next section. Where items are interdependent, this is noted clearly.

Time Estimate: Allow 2–3 business days for Google Play's first-time review. Store listing assets (screenshots, icon, description) should be prepared by the marketing team minimum one week before the intended submission date.

2. Pre-Submission Technical Checks

2.1 Build Verification

#	Check Item	How to Verify	Status
1	Release AAB generated without errors	'flutter build appbundle -release' completes with 0 errors	☐
2	AAB signed with production keystore	Run 'keytool -printcert -jarfile app-release.aab' and verify alias	☐
3	google-services.json included in build	Confirm file is in android/app/ before building	☐
4	Version code incremented from previous release	Check versionCode in android/app/build.gradle	☐
5	Version name reflects release (e.g., '1.0.0')	Check versionName in android/app/build.gradle	☐
6	App does not request legacy WRITE_EXTERNAL_STORAGE	Search AndroidManifest.xml; remove if found	☐
7	Minimum SDK set to API 21 (Android 5.0) or higher	Check minSdkVersion in android/app/build.gradle	☐
8	Target SDK set to API 34 (Android 14)	Check targetSdkVersion in android/app/build.gradle	☐
9	Release APK tested on	Install and verify all	☐

	physical device (smoke test passed)	primary flows per Deployment Guide Section 9	
10	'flutter analyze' returns 0 errors	Run 'flutter analyze' in project root	[]

2.2 Security Pre-checks

#	Security Item	Status
11	Firestore security rules deployed to Firebase Console	[]
12	Firebase API key rotated (if previously exposed in git)	[]
13	google-services.json added to .gitignore	[]
14	No hardcoded API keys or secrets in codebase	[]

3. Play Console Account Setup

#	Account Setup Item	Notes	Status
15	Google Play Developer account created	One-time USD 25 registration fee at play.google.com/console	[]
16	Developer account identity verified	Google requires real name and payment method verification	[]
17	App created in Play Console with correct package name	Package name: com.vishalgold.app (confirm with Engineering)	[]
18	Correct app type selected: App (not Game)	Select in 'Create app' wizard	[]
19	Default language set to English (India)	Can add regional languages later	[]

4. Store Listing Requirements

4.1 Visual Assets

All visual assets must be prepared by the client's marketing or design team and uploaded to the Play Console store listing editor. The specifications below are mandatory — assets not meeting these specifications will be rejected by Google Play.

Asset	Specification	Supplied By	Status
App Icon	512×512 px, 32-bit PNG with alpha; no rounded corners (Google adds them)	Marketing / Engineering	[]
Feature Graphic	1024×500 px, JPG or 24-bit PNG; no alpha; used as Play Store banner	Marketing Team	[]
Phone Screenshots (min. 2, max. 8)	Between 320 and 3840 px on shortest side; JPG or 24-bit PNG	Engineering / Marketing	[]
Short Description	Up to 80 characters; plain text only	Marketing Team	[]
Full Description	Up to 4000 characters; HTML formatting supported; include key features	Marketing Team	[]

4.2 Screenshot Recommendations

Ensure screenshots cover the following key user flows to maximize conversion on the Play Store listing: (1) Home / Product Catalog, (2) Product Detail with image viewer, (3) Cart screen, (4) OTP authentication, (5) Order History timeline. Avoid using emulator screenshots — use a real flagship Android device.

5. Content Rating & Policy Compliance

#	Policy Item	Expected Rating / Action	Status
20	Complete content rating questionnaire in Play Console	Expected: Everyone — IARC rating for a commerce/shopping app	[]
21	Confirm app does not contain adult/gambling/dangerous content	Not applicable to Vishal Gold — jewelry commerce app	[]
22	Confirm app requests only necessary permissions	Only SMS (OTP) and POST_NOTIFICATIONS are required	[]
23	No advertisements (AdMob or third-party) in	Confirm no ad SDKs; select 'No ads' in Play	[]

	the app	Console	
--	---------	---------	--

6. Privacy Policy Requirements

Google Play requires all apps that collect personal data to link to a publicly accessible Privacy Policy. The Privacy Policy provided in Document #08 of this delivery package must be published on a public web page (e.g., the Vishal Gold website or a hosted Google Doc) before submission.

#	Item	Status
24	Privacy Policy published at a public URL	[]
25	Privacy Policy URL entered in Play Console Store Listing	[]
26	Privacy Policy URL also entered in App Content section	[]

7. Data Safety Section

Google Play's Data Safety section requires the publisher to declare all types of data the app collects, shares, and how it is protected. This information is displayed on the app's Play Store listing and is mandatory from Android 13 target builds onwards. The following declarations should be made in the Play Console Data Safety form.

Data Type	Collected?	Shared?	Encrypted?	Optional?
Phone number	Yes	No	Yes (in transit)	No
Name	Yes	No	Yes	No
Device / Other IDs	Yes	No	Yes (in transit)	No
In-app purchase data	No	No	N/A	N/A
Photos / Videos	Yes (sample orders only)	No	Yes	Yes
App activity (crash logs)	Yes	No	Yes	No

#	Item	Status
27	Data Safety section completed in Play Console	[]
28	All data types declared accurately	[]
29	Privacy Policy URL linked in Data	[]

	Safety form	
--	-------------	--

8. Final Submission Steps

Complete all checklist items above, then follow these final submission steps.

#	Step	Notes	Status
30	Upload AAB to Play Console → Production → New Release	Ensure AAB, not APK	[]
31	Enter release name and release notes	Example: '1.0.0 — Initial Release: Vishal Gold App'	[]
32	Review pre-launch report in Play Console	Google Play automatically runs basic security scans — fix any Critical warnings	[]
33	Submit for review	First-time reviews take 1–3 business days; resubmissions are faster	[]
34	Monitor Play Console for review status and respond to any policy queries	Google may request additional information via email	[]
35	Perform post-publish smoke test on Play Store build	Install from Play Store and complete flows per Deployment Guide Section 7	[]

Post-Submission: Do not delete the signing keystore after submission. Every future update to the app must be signed with the same keystore. Google Play permanently links the app's identity to this key.
